

WINDOVERT

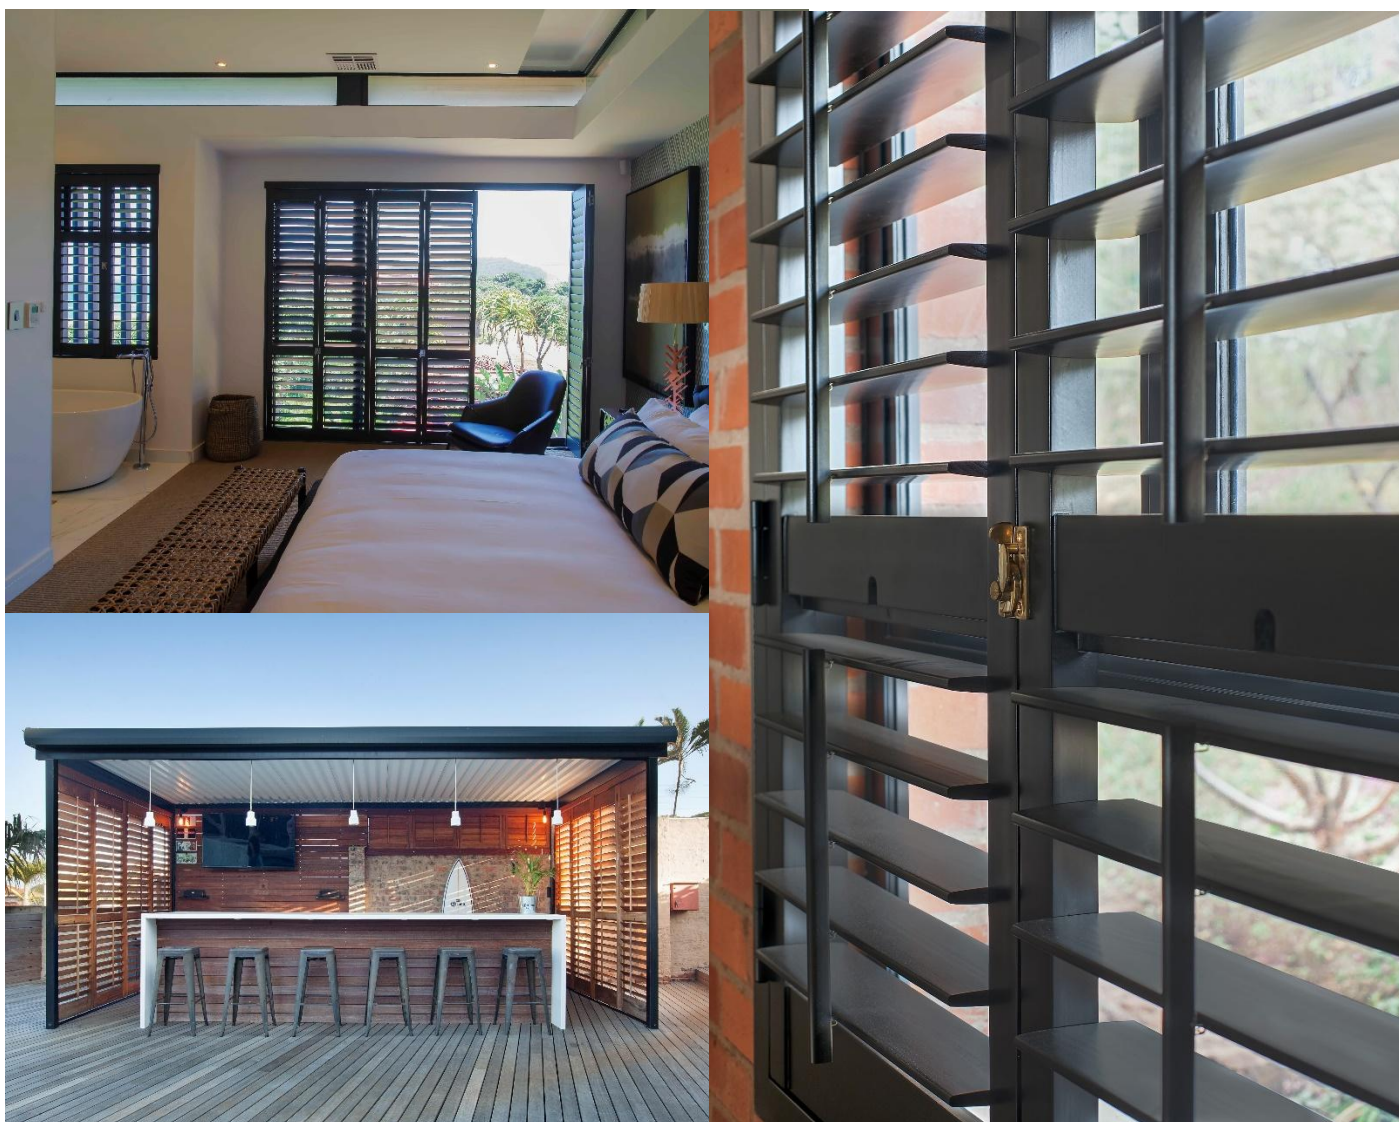

A world of window coverings

SOLID TIMBER SHUTTERS

Beautifully finished and manufactured in South Africa from real timber, our Solid Timber range of shutters is 100% custom made. For those whose sense of style often outweighs their budget, these shutters offer a stylish, yet affordable solution to bring a warm natural palette into your home.

They are available in all the configurations you have come to expect from the Windover shutter range; however, our timber range also offers you further design flexibility by adding a variety of shapes like circular, triangle, half circles - in fact, practically any shape you can think of.

Style should not sacrifice the ability to withstand inclement weather conditions, so these shutters are suited to both indoors and outdoors*. Our components and materials are up to 30% thicker and more robust than imported alternatives. This continues our now legendary reputation for supplying only the highest standards of quality, backed by a full 5-year warranty. **Outdoor range at premium pricing.*
