

AWNINGS

Create outdoor spaces to enjoy, no matter the weather, with our wide range of awning solutions.

From retractable fold-arm awnings that give you complete control and flexibility to more permanent aluminium options, we have the ideal awning to suit your needs.

Each installation is custom-made to your exact requirements, and with countless colours, materials and designs to choose from, you'll find the perfect match for your aesthetic.

Electronic and fully automated operating systems are available for ultimate convenience.

BENEFITS

Awnings offer an appealing combination of practicality, comfort, and aesthetics, making them an attractive and functional addition to any property.

They expand living areas to create pleasant outdoor spaces, allowing you to enjoy your patio, deck, or seating area to its full potential.

They also protect outdoor furniture and accessories from harsh sunlight and other elements, significantly increasing longevity.

FORENZA RETRACTABLE AWNING

Provides good shade for terraces, patios or any areas where coverage is needed but cannot disrupt a traffic area.

Fabric rolls from the upper side of the barrel.

For patios, it can extend to 3,5m projection.

Made of aluminium alloy and fitted with stainless steel pins, the arms are geometrically shaped and spring loaded to keep the cloth tensioned at all times. Arms fold back when retracted.

This type of shade can be drawn back to a compact position or extended for coverage as and when desired to any length of travel up to the maximum of 3,000mm or 3,500mm.

BARCELONA DROP ARM AWNING

The arms are spring loaded to hold the arms in the open position so that the fabric is under tension. When fully extended, the arms are at a 90° or 155° angle to the top of the awning.

Fabric is approximately 110mm (gear) or 100mm (motor) smaller than overall width.

Roller Support needed when width is wider than 4,800mm.

Can be motorised with either fixed position switch or remote control operation.

MILAN AWNING

Suitable for windows and doors where there is a limited space above to fix.

Milan awnings have mitered corners and are available in FIXED configuration only.

Back height is smaller than projection.

Using **18/28 Profile** - Back height 400-700mm

Projection 500- 900mm Width 1,000-3,000mm

Using **28/48 Profile** - Back height 400-700mm

Projection 500-1300mm Width 1,000-5,000mm

VENICE AWNING

Suitable for windows and doors. Available in a fixed or retractable figuration.

This awning has molded corners and is available in 3-5 arms, depending on width.

Same back height as projection for retractable configuration only.

Using **18/28 Profile**

Projection 500-900mm Width 1,500-3,000mm

Using **20/48 Profile**

Projection 500-1300mm Width 1,500-6,000mm

GLYDASHADE AWNING

A Glydashade fits under an existing pergola. (Pergola not included.)

Folds back to go under a rain pelmet (optional)

Fully assembled - Single valance, tracks, cleats, pulleys and cord.

Maximum spacing between folds is 500mm giving a depth of 250mm when retracted.
